

THE SPR DRYER

 **BRATNEY  
COMPANIES**  
*Integrating Innovative Solutions*

# THE SPR DRYER

# THE NEXT STEP IN SEED CORN DRYER TECHNOLOGY

**The Fully Automated Single Pass Reversing Dryer** from Bratney Companies is the latest big development in seed corn dryer technology. The SPR Dryer features industry-leading automation for filling, drying and reversing airflow, giving operators ultimate quality control, flexibility, precision and performance throughout the drying process.

Convenient safety features such as the harness and lanyard trolley provide operators security and mobility on the job. Modular units and a simplified, bolt-together design allow for increased flexibility and quick, efficient construction. Innovative, industrious and secure from top to bottom - the SPR Dryer will allow your seed drying operation to take the next big step in productivity, purity and seed quality.

## THE SPR DRYER PROVIDES:

**Ultimate Control:** Modular fan/burner units with dedicated fans for each bin allow for maximum management flexibility and quality control. Also includes individual temperature control system and air diverter controls.

**Safety:** Protective gear such as the harness and lanyard trolley, convenient hand and guardrails, and safety grating on bins.

**Access:** Easy-to-reach bin platforms and an outdoor roller platform for quick and easy access indoors or outdoors. Shell-out conveyor features accessible doors for easy wood unloading.

**Clarity:** Look in bins between varieties to ensure purity, or check the fill lines to determine corn bed depth.

**Protection from the Elements:** Dryer loading doors controlled by actuators and unique roof design helps keep out weather and the elements.

### Receiving Green Corn

- Design includes a special “dump door”
- Easy loading of conveyors afterward

### Choppers

- Hammermill technology including specialized cutter bars and blades
- Durable and strong components
- Access doors for easy maintenance such as replacing cutter bars

### Husk & Sort

- Additional offering for the full process advantage
