

ICE ES Series Sheller/Drum Pre-Cleaner

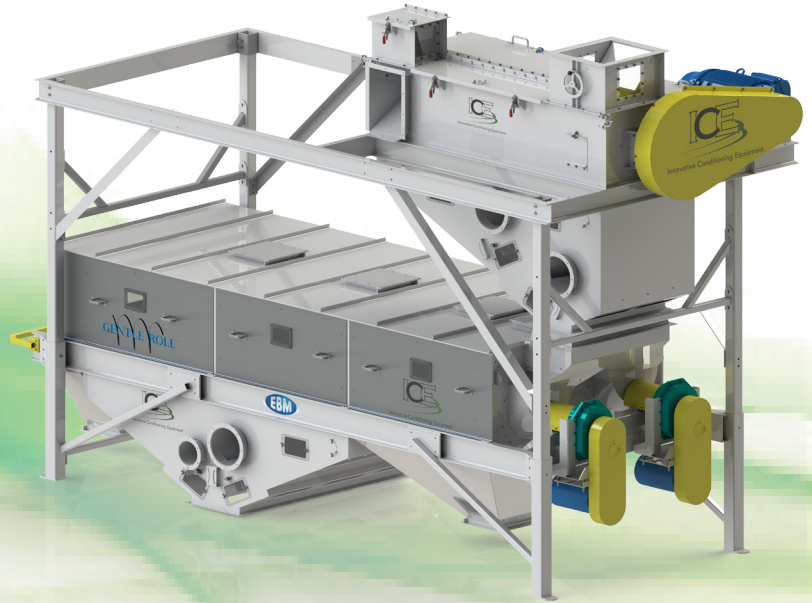

Need to update your current shelling operations? New to the market is the ICE ES Series Sheller/Drum style Pre-cleaner. With proven designs and new improvements, we are able to offer a more efficient and cost effective system with operator safety a priority. We have carefully redesigned the sheller/pre-cleaner and taken all suggestions from the field to make the New and Improved models the best in the industry.

Sheller/Drum Pre-Cleaner Capacities:

- ES2500 -- up to 3000 bph
- ES1200 -- up to 1500 bph
- ES250 -- up to 500 bph
- ES120 -- up to 150 bph

Standard Features:

- Gentle shelling
- Strategically placed multiple point aspiration system that requires less CFM than the competition
- Modular design will allow for more versatility in new AND existing installations
- Enclosed system design for more efficient dust control and added safety for the operators
- Multiple inspection points
- Quick screen release system for fast cleanout between hybrids.
- Designed to virtually eliminate dynamic load/vibration issues (compared to traditional reciprocating pre-cleaners), for easier and less costly installations.

The Latestest Improvements:

- Precision manufacturing with quality control for a superior fit and finish.
- Added high strength and abrasion resistant materials throughout the sheller cage and rotor to prolong equipment life.
- New PATENT PENDING cob door/shock system. This new system is easier to service and has less moving parts for improved operator safety.
- Standard lock tabs on all sheller access doors and optional lock style latches on the pre-cleaner for improved operator safety.
